EDUCATION

The University of Texas at Austin, Austin, TX

Bachelor of Science, Computer Science, Minor in Statistics and Data Science

Expected: May 2027

GPA: 3.5

SKILLS

Programming Languages: Java, Python, SQL, IBM Informix, R, C

AI & Machine Learning: Prompt Engineering, LLM Integration, Google Gemini API, k-Nearest Neighbors (kNN), Decision Trees, Naïve Bayes, Model Evaluation, Cross-Validation

Software Engineering: Backend & Full-Stack Development, REST API Design, API Integration, System Integration, CRUD Application Development, Business Workflow Automation

Web Development: FastAPI, HTML, CSS, JavaScript, Jinja2 Templates, Responsive Web Applications

Data & Databases: SQLAlchemy, Relational Databases (SQLite, PostgreSQL), Database Design, Data Modeling, Inventory & Transaction Systems

Data Analysis & Statistical Computing: Data Visualization, Exploratory Data Analysis (EDA), Descriptive Statistics, Data Cleaning

Cloud & Deployment: Render, Git, GitHub, Linux-based Development Environments, Docker

Frontend & Testing: React.js, Mocha.js

Languages: Mandarin Chinese (Native), English (Fluent), German (Conversational)

EXPERIENCES

Application Development Intern

June 2025 – August 2025

Four Js Development Tools

- Built and maintained backend-driven enterprise applications to replace manual business workflows, improving reliability and operational efficiency for production systems.
- Collaborated with an German international engineering team to translate business requirements into production-ready software features across development and client-facing contexts.
- Contributed across the full software development lifecycle, including requirements analysis, implementation, testing, and deployment within real-world enterprise constraints.

YouTube Content Creator

April 2020 – Present

Self-Employed

- Produced 60+ technical-focused aviation videos, translating complex systems and concepts into accessible content for a 3,100+ subscriber audience.
- Demonstrated strong technical storytelling and audience-aware communication skills by breaking down complex engineering and aviation systems for a non-technical audience, driving sustained engagement and organic channel growth.

PROJECTS

Resume Match Analyzer (Python, FastAPI, Gemini API)

May 2026

- Built and deployed a full-stack resume analysis platform featuring PDF resume ingestion, skill matching, compatibility scoring, and AI-generated feedback.
- Designed RESTful APIs with FastAPI and integrated Gemini API to provide real-time resume-job fit evaluation and actionable improvement suggestions.

Multi-Location Retail Inventory Management System

April 2026

- Developed a multi-location inventory management system to help my aunt's clothing shop that's been running for 28 years, enabling inventory tracking across warehouse and store locations through a centralized web dashboard.
- Designed and implemented backend services using Python, FastAPI, SQLAlchemy, and SQLite, supporting product management, inventory transfers, transaction auditing, low-stock monitoring, and real-time inventory visibility.
- Built a responsive management interface with HTML, CSS, Jinja2, and JavaScript, translating real-world retail workflows into software solutions and deploying the application publicly using Render.

Genero File Browsing Dialog (Internship – Four Js Development Tools)

August 2025

- Developed a reusable file navigation component for enterprise applications, improving usability and reducing duplicated file-handling logic across internal systems.
- Designed for seamless integration into mission-critical systems with minimal configuration overhead.

Genero Order Processing Application (Internship – Four Js Development Tools)

August 2025

- Built an internal order processing system to automate a paper-based licensing workflow, implementing input validation and email integration to reduce manual errors and processing time.
- Implemented structured input validation to ensure data integrity across multiple request types.
